WORK EXPERIENCE:

Senior MES Consultant - Engineering USA:

Jan 2022 - Current

- Implement custom functionality within the Siemens Opcenter EXFN environment, a fullstack MES System. This includes developing backend commands in C# to query and manipulate data from SQL tables, and front-end UI in both angular, and native JavaScript/HTML.

Web Developer - BLUE STAR SOFTWARE USA INC:

Feb 2019 - Current

- Contracted out to join, start or finish various Projects in which the role was to develop backend commands and front-end UI in the Siemens OpCenter EXFN system. The environment is a C#, and SQL backend with an Angular front end.

- Built functionalities to handle incoming SAP XML, and JSON documents, that would parse the document and apply the correct actions based on the document type, and current status of the system. The document could contain information to create a new order, update an existing order, start an order, or to manage the state of an operation within an order.

Teaching Assistant- Web Technologies

Jan 2018 - May 2018

- Assisted students in understanding new topics and course concepts.
- Helped students to debug errors, and guided them to the correct solution.
